Only 50 years ago, Dubai was a sleepy hamlet on the shores of the Arabian gulf that has transformed itself today, into a sprawling megapolis that is affectionately called "The Pearl of the Middle East".

It is indeed a tribute to the vision of the great rulers of the United Arab Emirates that today we have over 2400 kms of roads & highways. With such a huge investment in infrastructure, the next step is to ensure Road Safety where we at All Metals decided to step in with setting up of a state of the art Guard Rails manufacturing system in Dubai, UAE with integrated Hot Dip Galvanizing support from the existing facility on the same premises, making us the "PIONEERS" in Guard Rail manufacturing in the Emirate of Dubai.

The unit is now fully operational and can cater to all requirements for Guard rails & accessories both in Black as well as in Hot dip galvanized condition. Our product conforms to AASHTO standards and our galvanizing conforms to EN ISO 1461 : 2009 / ASTM standards.

Products that can be offered include :

- W – Beams
- Channel Posts
- Channel Spacers
- W Beam Accessories
- Hardware for fitment of Guard Rails
